

# SCHOLARSHIPS IMPACT REPORT

FALL 2020 – SPRING 2021

**“This scholarship will help to shape the way I live from this point on. I can’t thank you enough for the ability to become a better veterinarian and eventually give back to students just like me. My educational pursuits would not be possible without you, so I hope to live up to this honor.”**

**ALEXANDREA BAILEY**  
D.V.M. MAJOR

**“Thank you for your support toward my education. With this scholarship, I can make the most of my final year as an undergraduate student and finalize the foundation on which I will begin to build my professional career as a doctor in the coming years.”**

**FRANCO MARANON**  
MICROBIOLOGY MAJOR

## SPOTLIGHT ON COLLEGE SCHOLARSHIPS

# \$50

average gift size

# 7,300

donors supporting scholarships

# \$40.3M

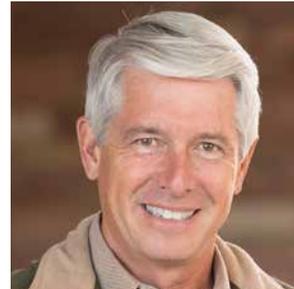

total dollars awarded from donor philanthropy

# 89%

graduation rate of students who receive scholarships

## A MESSAGE FROM THE DEAN

Because of you and others like you, who continue the tradition of philanthropy during these uncertain times, we’re able to provide critical aid to our students. These students are first-generation students, new parents, military veterans, survivors, artists, and musicians. They all have a common goal: to pursue their passions and cultivate their talents in the College of Veterinary Medicine and Biomedical Sciences. When our students applied to study in our college, it was way before the COVID-19 crisis hit. I am grateful and hopeful that these great young minds have come to Colorado State University to learn about science and health, an area that is urgently important to the future of our world. Our students are critical to our future, and our faculty and staff are helping to chart their journeys. Together, right now, we are developing new solutions to pandemics and global health issues that affect animals and humans. Thank you for playing such an important role in our students’ success.

**MARK STETTER,**  
D.V.M., DIPL. ACZM  
Dean, College of  
Veterinary Medicine  
and Biomedical  
Sciences
