

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/15/2022	Sony	Research Grant	Faculty Innovation: Up to \$100,000 Focused Research: Up to \$150,000	Engineering, Physical Sciences	The Research Award Program provides funding for cutting-edge academic research and helps build a collaborative relationship between faculty and Sony researchers. For Faculty Innovation Awards , Sony provides up to \$100K in funds to conduct pioneering research in a variety of research areas. (See website for a complete list). For Focused Research Awards , Sony provides an opportunity for university faculty to conduct collaborative, focused research in a few topic areas. (See website for list and descriptions)
9/15/2022	National Scleroderma Foundation	Research Grant	New Investigator: \$200,000 (over 3 years) Established Investigator: \$200,000 (over 2 years)	Medical Research, Scleroderma, Translational	The National Scleroderma Foundation supports new and established investigators based on investigator-directed topics to advance its mission. Appropriate research areas may include but are not limited to the following as they relate to scleroderma: scleroderma-related lung disease, pediatric scleroderma, vascular manifestations, studies of animal models, therapeutic modalities, mechanisms of end organ damage, immunologic studies, endothelial cell biology, fibroblast biology, models and markers of gender and genetic factors, cell signaling, epidemiology studies, matrix biology, stem cell biology, health services research (e.g., quality of life, healthcare delivery), and study of clinical manifestation. New Investigator - Applicants must have a doctoral degree in Medicine, Osteopathy, Veterinary Medicine or one of the sciences; and must have completed a postdoctoral fellowship by the grant award date. Established Investigator - Applicants must have a doctorate degree in Medicine, Osteopathy, Veterinary Medicine or one of the sciences; must have completed a postdoctoral fellowship; and have been principal investigator on grants from the National Scleroderma Foundation or other national, private or government agencies in the past.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/15/2022	Teiger Foundation	Programmatic Grant	Up to \$150,000 Touring Exhibitions & Curatorial Research: Up to \$50,000	Contemporary Art, Exhibitions, Curatorial Research	Teiger Foundation funds exhibitions, commissions, performances, public program series, related publications, and other curator-led initiatives that involve contemporary art and artists. They provide support for a single project at a non-profit exhibition space with an annual budget above \$3 million. They will also provide support for three years of programming at a smaller organization with an annual budget below \$3 million. Teiger Foundation also offers two other grant opportunities through this call for proposals: venues who wish to host touring exhibitions . Curators or artistic directors can apply to bring an exhibition originating elsewhere to the distinct context of their own institution and community; Curatorial research including costs related to travel, convenings, and collaborative investigations around critical issues leading up to an exhibition or other project.
9/15/2022	American Society of Interior Designers (ASID)	Research Grant	Grant A - Seed/Start Up Funds: Up to \$30,000 Grant B - Research Project: Up to \$70,000	Interior Design, Diversity Equity & Inclusion	The Transform Research Grant program is focusing on how diversity, equity, and inclusivity can be supported through interior design. Proposed research projects should be rooted from research questions that empirically investigate potential solutions, generate measurable results on the impact of design, and translate the findings into actionable design recommendations, guidelines, and/or tools that designers can apply in their design projects. Grant A: supports the exploration or pilot phase of broader research initiatives; to be completed in nine months or less (not including dissemination). Grant B: investigate how design can transform lives; to be completed in 15 months or less (not including dissemination).

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/15/2022	American Psychological Foundation	Research Grant	\$18,000	Psychology, Early Career	The American Psychological Foundation is inviting applications for its Bruce and Jane Walsh Grant . Through the program, a single grant will be awarded in support of scientific, scholarly or applied research and/or educational activities focused on how personality, culture, and environment influence work behavior and health, both mental and physical. Preference will be given to early-career psychologists (ten years or less postdoctoral), pilot projects that, if successful, would be strong candidates for support from major federal and foundation funding agencies, and "demonstration projects" that promise to generalize broadly to similar settings in other geographical areas and/or other settings.
9/15/2022 (LOI)	American Lung Association	Research Grant	Up to \$200,000 (over 2 years)	Infections Disease, COVID-19, Lung Cancer	The American Lung Association COVID-19 and Respiratory Viruses Research Award is intended to support independent investigators with a stellar track record of accomplishment, who have the potential to advance our knowledge and understanding of COVID-19 and other novel respiratory viruses with epidemic potential. The Lung Cancer Discovery Award is Intended to support independent investigators conducting clinical, laboratory, epidemiological or any groundbreaking project aimed at revolutionizing our current understanding of lung cancer and improving diagnostic, clinical and treatment methods. At the time of application, the applicant must hold a doctoral degree and have a faculty appointment or equivalent with demonstrated institutional commitment (salary support, research space as evidenced by a Department Chair or equivalent letter) in a recognized academic not-for-profit research institution.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/15/2022	Tree Research and Education Endowment Fund	Research Grant	<p>John Z. Duling: Up to \$25,000 (over 1-3 years)</p> <p>Building Bridges: Up to \$30,000</p>	Forestry, Biology	The TREE Fund has two opportunities for grant funding. The John Z. Duling Grant Program provides start-up or seed funding to support innovative research and technology transfer projects that have the potential of benefiting the everyday work of arborists. Funding may be used to support exploratory work in the early stages of untested, but potentially transformative, research ideas and approaches. The Bob Skiera Memorial Fund Building Bridges Initiative is intended to help arborists and urban foresters communicate the value of trees and urban forests through engagement via collaborative research and other projects with public works officials, risk assessment professionals, civil engineers, wildlife researchers, soil scientists and others.
9/15/2022	Alfred P. Sloan Foundation	Research Grant	\$75,000	Chemistry, Computer Science, Economics, Mathematics, Molecular Biology, Neuroscience, Ocean Science, Physics, Early Career	The Sloan Research Fellowships seek to stimulate fundamental research by early-career scientists and scholars of outstanding promise. Successful candidates for a Fellowship generally have a strong record of significant independent research accomplishments that demonstrate creativity and the potential to become future leaders in the scientific community. Nominated candidates are normally several years past the completion of their Ph.D. in order to accumulate a competitive record of independent, significant research. Candidates must hold a Ph.D. or equivalent degree in chemistry, computer science, economics, mathematics, molecular biology, neuroscience, ocean sciences, physics, or a related field. Candidates must be tenure-track, though untenured, as of September 15, 2021. More than one candidate from a department may be nominated, but no more than three.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/15/2022 (LOI) 3/15/2023 (LOI)	Eppley Foundation for Research	Research Grant	Up to \$30,000	Chemistry, Physics, Biology, Ecology, Climate Change	Proposals are sought that increase knowledge in chemistry, physics and biology through study, research and publication. The Foundation does not support work in the social sciences, education or computer science, and only rarely funds research into diseases that have considerable financial support available, such as AIDS, diabetes, cancer and heart disease. Particular areas of interest include innovative medical investigations, climate change, whole ecosystem studies, as well as research on single species if they are of particular significance in their environments, in the U.S. and abroad. The Foundation does not fund work that can qualify for funding from conventional sources such as the National Science Foundation or the National Institutes of Health, or similar agencies at the state level. It is important to the Foundation that the work proposed be novel in its insights and unlikely to be underway elsewhere. PhDs or MDs with an established record of publication in their specialties are eligible. Candidates with newly awarded doctorates occasionally, but rarely, meet the Foundation's requirements for advanced research.
9/15/2022	Les Paul Foundation	Grant	Up to \$50,000	Music, Engineering, Hearing Loss	The Les Paul Foundation invites applications for its grants program, which awards grants to programs and projects that encourage innovation in music production and/or performance and to innovative STEM or STEAM programs for students and others in challenging situations. Proposals for medical research related to curing tinnitus and other hearing impairment issues are considered.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/16/2022	Cigna	Grant	\$150,000 - \$300,000 (over up to 3 years)	Health Care, Health Inequity, Mental Health, Underserved Populations	Cigna invites applications for its Health and Well-Being grants program. Grants will be awarded to nonprofits addressing the root causes of health inequity and supporting under-resourced and systemically disadvantaged communities with poor social determinants of health. Grants should address at least one, if not more than one, of the following programmatic areas, specifically in ethnic minority and underserved populations: suitable care that provides access to mental health services and addresses depression, stress, anxiety, and promotes resiliency and mental well-being; programs addressing the shortage of mental health care professionals; and cultural competency and awareness training for healthcare providers that addresses the stigma associated with seeking mental health care.
9/16/2022 (LOI)	Leukemia & Lymphoma Society (LLS)	Research Grant	Up to \$750,000 (over 3 years)	Health Care, Public Health, Public Policy	Through the Equity in Access Research Program , LLS aims to generate new evidence that can guide policy reform and changes in healthcare practice, in order to mitigate the impact of the social, economic and environmental disadvantages and reduce barriers to care. The Principal Investigator must have a PhD, MD, ScD, JD, or equivalent doctoral degree. The Principal Investigator and other study team members may come from a variety of disciplines, including but not limited to health services research, public health, economics, sociology, public policy, political science, public administration, medicine, and law.
9/16/2022 (LOI)	The Orphan Disease Center	Research Grant	\$50,000 - \$175,000 (Depending on disease studied)	Medical Research	The Million Dollar Bike Ride Pilot Grant Program provides a one-year grant to support research related to a rare disease represented in the 2022 Million Dollar Bike Ride. (See RFP for complete list of 30+ diseases) All individuals holding a faculty-level appointment at an academic institution or a senior scientific position at a non-profit institution or foundation are eligible to respond to this RFA.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
Rolling Until 9/16/2022	Environmental Justice Data Fund (Google)	Grant	Up to \$500,000	Environmental Justice, Climate Change, Data, Community Outreach	The Environmental Justice Data Fund aims to help frontline communities that have been historically underserved and disproportionately impacted by climate change and environmental injustice. The Fund will enable frontline communities in the United States to use data to unlock resources, increase their access to Justice40 benefits and federal infrastructure funding, and advocate for new policies that empower communities to address past environmental harm and pave the way to a more sustainable, climate-resilient future. The Fund will consider a broad range of approaches to using data to advocate for environmental justice at the local and regional level. It will provide organizations with flexible project funding to increase their organizational capacity to incorporate quality data work into their environmental and climate justice programming. Environmental justice organizations the Fund will support must: Aim to create a local social and/or environmental impact; Center the perspectives of frontline communities, especially those with Black, Indigenous, and People of Color (BIPOC) leadership.
9/19/2022 (LOI) Limited Submission: Apply through Research Acceleration Office	Greenwall Foundation	Research Grant	\$328,845	Bioethics, Early Career	The Greenwall Faculty Scholars Program in Bioethics is a career development award to enable junior faculty members to carry out innovative bioethics research. It supports research that goes beyond current work in bioethics to help resolve pressing ethical issues in clinical care, biomedical research, and public policy, and creates a community that enhances future bioethics research by Scholars and Alumni/ae. Each year, the Foundation selects approximately three Greenwall Faculty Scholars to receive 50 percent salary support for three years to enable them to develop their research program. Applicants must be junior faculty members.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/20/2022 (LOI)	The Alzheimer's Drug Discovery Foundation	Research Grant	PACT: Up to \$3,000,000 DD: Up to \$600,000 PP: Up to \$3,000,000 BD: Up to \$600,000	Medical Research, Alzheimer's Disease	ADDF currently has four opportunities: The Program to Accelerate Clinical Trials (PACT) supports IND-enabling studies and early-phase clinical trials that test promising pharmacological interventions and devices for Alzheimer's disease (AD) and related dementias. Both disease-modifying and symptomatic agents will be considered. The Drug Discovery (DD) program seeks to support in vivo preclinical studies that advance lead molecules developed for Alzheimer's disease and related dementias to IND-enabling studies. The proposed studies should be structured to deliver a compound with strong potential for clinical and commercial application. The Prevention Pipeline (PP) program supports studies of cognitive symptoms due to health conditions, comparative effectiveness research, and epidemiological studies that probe whether the use or choice of drugs alters the risk for dementia or cognitive decline. The aim of the Neuroimaging and CSF Biomarker Development is to further develop and validate established biomarkers for which there is a clear clinical need in Alzheimer's disease and related dementias. This RFP prioritizes biomarkers with a defined context of use, a clear advantage over other relevant biomarkers, and a path to commercialization and/or clinical use. Funding in all programs is open to researchers, clinicians, and postdoctoral fellows.
9/21/2022 Limited Submission: Apply through Research Acceleration Office	Blavatnik Family Foundation	Award RAO Limited Submission	\$250,000	Engineering and Physical Sciences Environmental & Life Sciences	The Blavatnik National Awards recognize and celebrate America's most innovative and promising faculty-rank scientists and engineers in three disciplinary categories: Life Sciences, Physical Sciences & Engineering, and Chemistry. Candidates for the 2022 Blavatnik National Awards must be nominated by their institutions. The nominee must have been born in or after 1981.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/21/2022	Facebook (Meta)	Research Grant	\$100,000	Computer Science, Social Sciences, Privacy	The People’s Expectations and Experiences with Digital Privacy RFP seeks to better understand people’s privacy concerns and how they’re formed, as well as how people perceive potential privacy risks that Meta can help address. They aspire to use this increased understanding to develop privacy-centric products, innovate in technical privacy solutions, inform robust data policies, and advance internal privacy programs and practices. They are keen to support academics across the social sciences and technical disciplines, including but not limited to disciplines such as anthropology, communications, computer science, economics, engineering, human-computer interaction, human factors, political science, social psychology, and sociology. Areas of interest include: Developing a deeper understanding of different types of privacy risks and Expanding understanding of what factors differentially predict privacy attitudes.
9/23/2022 (LOI)	Rally Foundation	Research Grant	Young & Independent Investigator: Up to \$100,000 (over 2 years) Consortium Grants: Up to \$200,000 (over 2 years)	Medical Research, Pediatric Cancer, Translational, Early Career	The Rally Foundation invites letters of intent for funding of pediatric cancer projects in the following areas: Innovative approaches to research which could lead to advanced studies or clinical trials; Basic science studies that are likely to lead to a new discovery; Personalized, targeted, alternative or integrative research proposals; Under-studied cancer types; Quality of life, survivorship and palliative care studies; Data utilization through data standardization, collection, storage, analysis and sharing. Young Investigator and Independent Investigator Grants are for one or two years of support. Young Investigators must be no more than five years post fellowship. Consortium Grants are for multi-institutional (three or more) collaborative research projects. They are for one or two years of support.
9/26/2022	EveryCat Health Foundation	Research Grant	Up to \$100,000	Feline Health, Kidneys	EveryCat Health Foundation is calling for proposals that address the effect that dietary phosphorus and calcium to phosphorus ratio have on renal health in cats as well as biomarkers to detect early renal disease. The overall goal is to provide evidence that will lead to scientific consensus on safe levels and types of dietary phosphorus for feline diets.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/26/2022	Simons Foundation	Fellowship Grant	Up to \$100,000	Physics, Mathematics	Proposals are sought for two Simons Fellows programs: Theoretical Physics and Mathematics . The Simons Fellows program makes sabbatical research leaves more productive by extending them from a single term to a full academic year. Awards will be based on the applicant's scientific accomplishments in the five-year period preceding the application and on the potential scientific impact of the work to be done during the leave period. Eligibility is restricted to sabbatical or equivalent leave-eligible faculty who wish to use the fellowship award for the purpose of extending at least a single-term sabbatical research leave to a full academic year. The fellowship program will not support the extension of a full year of sabbatical research leave to an additional term.
9/28/2022	Howard Hughes Medical Institute (HHMI)	Award	\$8.6 Million (over up to 10 years)	Biology, Medical Research, Translational, Diversity Equity and Inclusion, Early Career	HHMI is seeking creative and innovative early career faculty for their new Freeman Hrabowski Scholars Program . They are looking for outstanding basic researchers who have strong potential to become leaders in their fields and to advance diversity, equity, and inclusion through their mentorship and understanding of the experiences of trainees from races and ethnicities underrepresented in US science. The program is open to individuals who: hold a PhD and/or MD (or equivalent); began their first post-training position and a tenure-track (or equivalent) faculty position on or after July 1, 2018, or have accepted an offer for a tenure-track (or equivalent) position that will begin no later than July 1, 2023; maintain a tenure-track appointment or equivalent at an eligible US institution; federal government employees are not eligible; have a research focus in any area of basic biomedical science, as well as plant biology, evolutionary biology, biophysics, chemical biology, biomedical engineering, and/or computational biology.
9/28/2022	National Ataxia Foundation	Research Grant	Up to \$50,000	Medical Research, Ataxia, Translational, Early Career	The Early Career Investigator Award was created to encourage early career clinical and scientific investigators to pursue a career in the field of Ataxia research. It is our hope that Ataxia research will be invigorated by the work of talented individuals supported by this award. Applicant must have an appointment as a junior faculty member, senior post-doc, or clinical fellow and PhDs must be no more than 5 years from the end of completion of post-doc training.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/29/2022 (LOI)	National Ataxia Foundation	Research Grant	Up to \$50,000	Medical Research, Ataxia, Translational	The National Ataxia Foundation offers Seed Money Research Grants for new and innovative studies that are relevant to the cause, pathogenesis or treatment of the hereditary or sporadic ataxias. Offered primarily as “seed monies” to assist investigators in the early or pilot phase of their studies and as additional support for ongoing investigations on demonstration of need.
9/29/2022 (LOI)	Patient-Centered Outcomes Research Institute (PCORI)	Project Grant	Up to \$250,000	Medical Research, Developmental Disabilities, Community Outreach	The Eugene Washington PCORI Engagement Awards support projects—not research studies— that encourage active, meaningful involvement of patients, caregivers, clinicians, and other healthcare stakeholders as integral members of the patient-centered outcomes research/comparative clinical effectiveness research (PCOR/CER) enterprise.
9/30/2022 (LOI)	Caplan Foundation for Early Childhood	Grant	Up to \$100,000	Childhood Education, Childhood Welfare, Parenting Education	Caplan Foundation for Early Childhood's goal is to provide seed money to implement imaginative proposals that exhibit the greatest chance of improving the lives of young children, on a national scale. They fund projects in the following areas: Early Childhood Welfare - projects that seek to perfect child rearing practices and to identify models that can provide creative, caring environments in which all young children thrive. Early Childhood Education and Play - improving the quality of both early childhood teaching and learning, through the development of innovative curricula and research based pedagogical standards, as well as the design of imaginative play materials and learning environments. Parenting Education - programs that teach parents about developmental psychology, cultural child rearing differences, pedagogy, issues of health, prenatal care and diet, as well as programs which provide both cognitive and emotional support to parents.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/30/2022 (LOI)	Alpha-1 Foundation	Research Grant	<p>Bridge: Up to \$25,000</p> <p>Pilot: Up to \$75,000</p> <p>Research: Up to \$200,000 (over 2 years)</p>	Medical Research, Alpha-1 Antitrypsin Deficiency, Translational, Social Science	The specific aims of the Grants Award Program are to promote research that would eventually result in the improved health of individuals with AAT Deficiency. The Program supports basic science and clinical research, improved understanding of the pathogenesis of the clinical manifestations of AAT Deficiency, the development and testing of treatments for the disease, bioethics and social research, and the promotion of education of members of the medical community regarding AAT Deficiency. The Alpha-1 Foundation will support a broad spectrum of research projects involving basic science, translational and clinical research, and ethical, legal, and social issues. Bridge Grants provide support for excellent AAT-related research projects that have been submitted to and approved by the National Institutes of Health (NIH), but cannot be supported by the available NIH funds. Pilot and Feasibility Grants encourage the development and testing of new hypotheses and/or new methods in research areas relevant to AAT Deficiency. Proposed work must be hypothesis generating or hypothesis testing, reflecting innovative approaches to important questions in AAT research or development of novel methods, and providing sufficient preliminary data to justify the Foundation's support. Research Grants encourage the development of new information that contributes to the understanding of the basic biology of alpha-1 antitrypsin expression, and the pathogenesis/management of AAT Deficiency.
9/30/2022	Stockholm International Water Institute	Prize	\$150,000	Water, Natural Resources	The Stockholm Water Prize is awarded to individuals, institutions or organizations whose work contributes to the conservation and protection of water resources and to improved health of the planet's inhabitants and ecosystems. The ideal nominee should have made achievements of lasting significance in developed or developing countries and provided stimulation for further important work. Self-nominations or nominations made by persons closely related to the nominee aren't accepted.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
9/30/2022	Wiley Foundation	Prize	\$50,000	Biomedical Science	The Wiley Prize in Biomedical Sciences celebrates research that champions novel approaches and challenges accepted thinking in the biomedical sciences. It honors a specific contribution or series of contributions that demonstrate significant leadership or innovation in the development of research concepts or their clinical application. Each nomination should be submitted by someone other than the nominee.
9/30/2022 (LOI)	Kenneth Rainin Foundation	Research Grant	Up to \$200,000 (over 1 year)	Medical Research, Inflammatory Bowel Disease, Translational	The Innovator Awards program provides grants for one-year research projects that push boundaries to advance the Rainin Foundation's goal of predicting and preventing Inflammatory Bowel Disease (IBD). They invest in new and veteran IBD researchers alike and embrace novel, untested ideas. Innovator Awards may have only one principal investigator.
10/1/2022	Mike Slive Foundation for Prostate Cancer Research	Research Grant	\$50,000	Medical Research, Prostate Cancer, Translational	Guided by a commitment to find a cure for prostate cancer, the Mike Slive Foundation for Prostate Cancer Research funds pilot grants for innovative research in an effort to allow researchers to establish proof-of-concept when applying for larger, highly competitive federal grants. Research projects may focus on any topic related to the scientific study of prostate cancer, including but not limited to the prevention, diagnosis, treatment, or etiology of prostate cancer. The investigation of these topics may be basic, translational, behavioral, or clinical in nature.
10/1/2022	Pacific Institute for the Mathematical Sciences	Programmatic Grant	\$240,000 CAD (over 3 years)	Mathematics	A Collaborative Research Group (CRG) is a group of researchers with overlapping scientific interests and a common desire to collaborate. PIMS awards successful CRG applicants up to \$240,000 CAD in research funding spread over three years to facilitate postdoctoral appointments, event organization, and scientific exchanges. This permits a CRG to gather a significant portion of the world's experts in its research topic for a period of intense collaboration. Interested researchers are strongly encouraged to contact PIMS staff to ensure that their application makes optimal use of resources in the PIMS Network.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/1/2022 (LOI)	Whitehall Foundation	Research Grant	Research Grants: Up to \$225,000 (over 3 years) Grants-in-Aid: Up to \$30,000	Life Sciences, Biological Research	It is the Foundation's policy to assist those dynamic areas of basic biological research that are not heavily supported by Federal Agencies or other foundations with specialized missions. Research Grants are available to established scientists of all ages working at accredited institutions in the United States. The Grants-in-Aid program is designed for researchers at the assistant professor level who experience difficulty in competing for research funds because they have not yet become firmly established. The Foundation will accept only one letter of intent per year from an Investigator.
10/1/2022	Gairdner Foundation	Prize	\$100,000 CDN (~\$77,500)	Biomedical Science, Life Science, Translational research	The Canada Gairdner International Award recognizes outstanding biomedical scientists who have made original contributions to medicine with the goal of contributing through research to increased understanding of human biology and disease. Nominees should be individuals whose “seminal discoveries and major scientific contributions constitute an original and significant achievement in biomedical science.” Nominations in the field of translational research are welcome.
10/1/2022 2/1/2023 6/1/2023	Fibrolamellar Cancer Foundation	Research Grant	Up to \$180,000	Medical Research, Cancer, Fibrolamellar Hepatocellular Carcinoma, Translational	The Fibrolamellar Cancer Foundation is accepting proposals to support innovative research, leading to curative treatments for this aggressive teen/young adult liver cancer. The research must focus on fibrolamellar hepatocellular carcinoma. Studies should be intended to advance knowledge in the areas of FL-CC. Of particular interest are those showing a clear path to clinical trials. Collaboration and open sourcing is a requirement for FCF funding and will be so specified in any grant agreement.
10/3/2022	Grayson-Jockey Club Research Foundation	Research Grant	Up to \$100,000	Veterinary Medicine, Equine Health	The Grayson-Jockey Club Research Foundation, Inc. supports research relevant to equine health and performance. Proposals are sought for general research grants.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/4/2022 (LOI) <i>Opens 9/7/22</i>	Patient-Centered Outcomes Research Institute (PCORI)	Research Grant	Up to \$10 million	Healthcare, Telehealth, Vulnerable Populations	PCORI is seeking to fund high-quality, comparative clinical effectiveness research (CER) projects that focus on different approaches to incorporating access to and use of telehealth to optimize management of multiple chronic conditions in primary care, particularly among vulnerable populations. This funding announcement is soliciting applications that respond to the following question: What is the comparative clinical effectiveness of different approaches to incorporating access to and use of telehealth to optimize management of multiple chronic conditions in primary care, particularly among vulnerable populations? Applications should focus on community-dwelling individuals with multiple chronic conditions and should be powered to allow for conclusions regarding one or more vulnerable populations of interest.
10/4/2022 (LOI)	Burroughs Wellcome Fund	Research Grant	\$700,000 (over 5 years)	Biomedical Science, Translational, Early Career	The Career Awards for Medical Scientists is a highly competitive program that funds physician-scientists, who are committed to an academic career, to bridge advanced postdoctoral/fellowship training and the early years of faculty service. Proposals must be in the area of basic biomedical, disease-oriented, or translational research. Proposals in health services research or involving large-scale clinical trials are not eligible. Candidates must hold an M.D., D.D.S., D.V.M., or D.O. degree. Competitive candidates for the CAMS award will have at least two years of research experience, be two years away from becoming an independent investigator, be a first author on at least one publication in a high impact top-tier journal, and have a significant publication record.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/4/2022 (LOI)	Patient-Centered Outcomes Research Institute (PCORI)	Research Grant	Category 1: Up to \$5 Million Category 2: Up to \$10 Million	Medical Diagnosis & Treatment, Healthcare Systems, Racism	The Broad Pragmatic Studies PFA will offer two categories for award size, with targeted funding allotments for each, to promote a balance of smaller and larger studies within the funded portfolio. Category 1: Addressing Disparities; Assessment of Prevention, Diagnosis, and Treatment Options; Improving Healthcare Systems, Communication & Dissemination Research. Category 2: Addressing Disparities; Assessment of Prevention, Diagnosis, and Treatment Options; Improving Healthcare Systems. In addition, the following special areas of interest are permitted to apply to either category: Addressing Systemic Racism, Discrimination and Bias in Healthcare Systems and Care Delivery; Health System-Level Interventions to Improve Health Care Worker Well-Being and Reduce Burnout.
10/4/2022	The Center for Craft (University of North Carolina at Asheville)	Grants	Up to \$15,000	Arts & Humanities, Crafts	Craft Research Fund Exhibition Grants are awarded to support exhibition research that encourages, expands, and supports scholarly craft research in the United States. Craft Research Fund Project Grants are awarded to support projects that encourage, expand, and support scholarly craft research in the United States.
10/5/2022 (LOI)	National Ataxia Foundation	Research Grant	\$100,000	Biomedical Science, Spinocerebellar Ataxia Type 3, Translational	Pioneer SCA3 Translational Research Awards facilitate the development of treatments for the Spinocerebellar Ataxia Type 3 (SCA3). Proposals may incorporate other forms of ataxia but must have a predominant focus on SCA3 translational or clinical research.
10/7/2022	Morris Animal Foundation	Research Grant	Up to \$10,000	Veterinary Medicine, Horses	The Morris Animal Foundation is pleased to announce their Equine Behavior Relating to Health and Welfare RFP for pilot proposals. The focus should be on improving the lives of horses by increasing the understanding of the behavioral domain. This includes areas such as cognition, learning, stereotypes, separation anxiety, affiliative behavior toward (bonding with) humans, the effects of equine temperament on welfare, and equine psychopharmacology. Projects using behavioral measurements simply as a tool to address non-behavioral hypotheses are not of interest. Pilot study proposals should be aimed at generating data to prove the viability of a novel approach or idea. The project may involve domesticated or wild horses.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/10/2022	Conservation Leadership Program (CLP)	Research Grant	\$15,000	Conservation, Early Career	CLP Future Conservationist Awards will be granted to teams of early-careers conservationists to conduct projects on target species that are listed as Data Deficient, Vulnerable, Endangered or Critically Endangered on the IUCN Red List. Projects must take place in one of the eligible countries (see website for list) be led (or co-led) by a national of one of these countries, involve at least three people and last no more than 12 months. All team members must be early-career conservationists with no more than five years of paid work experience in the conservation sector.
10/11/2022	March of Dimes Birth Defects Foundation	Research Grant	\$200,000 (over 2 years)	Medical Research, Pregnancy, Translational	March of Dimes is actively seeking applications for research grant funding that involves translational and actionable science that will lead directly to interventions or preventions. Our goal is to turn observations in the laboratory, clinic, and community into interventions, therapeutics, and diagnostics that improve the health of moms and babies. The proposed research should focus on one of these priority areas: Late, spontaneous pre-term birth; Racial inequities as they relate to morbidity and mortality outcomes for mothers and babies; Cardiovascular health conditions developed during pregnancy or exacerbated during pregnancy; Maternal stress, its impact on pregnancy outcomes, and how to mitigate the effects. Individuals from underrepresented and disadvantaged groups are encouraged to apply.
10/11/2022	Pfizer	Research Grant	Up to \$250,000	Medical Research, Obesity, Translational	With the 2022/2023 Global Obesity ASPIRE Competitive Grant Program , Pfizer will fund research on the topics of pathophysiology and biology of overweight and obesity, understanding obesity as a disease, utilizing retrospective databases, and generating evidence of optimal management of obesity and co-existing comorbid conditions. The following types of research will be considered in-scope: Basic science, pre-clinical research, and clinical research that aligns with the in-scope research topics; Animal experimentation related to human biology; Physiological, cellular, molecular and translational research. The applicant (PI) must have a medical or postdoctoral degree (MD, PhD, or equivalent), an advanced nursing degree (BSN with a MS/PhD), or a degree in Pharmacy, Physiotherapy, or Social Work.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/13/2022 (LOI)	Foundation Fighting Blindness	Research Grant	Up to \$500,000 (over 5 years)	Medical Research, Blindness, Translational	The Program Project Award engages cross-disciplinary investigators to drive collaborative retinal degenerative disease research efforts. The PPA enables studies that are too large or technically complex for a single investigator to undertake in a reasonable amount of time and to address current knowledge and/or therapeutic gaps. Principal Investigators must hold an M.D., D.M.D., D.V.M., D.O., Ph.D. or recognized foreign equivalent and occupy a faculty position or equivalent position at a college, university, medical school, or other public or private research institution/facility. Application is not limited to the U.S. or U.S. citizens. Applicants who are not U.S. citizens and reside and work outside the U.S. may apply.
10/14/2022	University of Pittsburgh	Prize	\$50,000	Medical Research, Biomedical Science, Translational	The Dickson Prize in Medicine is awarded annually to an American biomedical researcher who has made significant, progressive contributions to medicine. Nominations should be of individuals actively engaged in innovative, paradigm-shifting biomedical research that is worthy of significant and broad attention, who are at an especially productive point currently, and whose research is — or will be — so influential that it deserves major recognition today. Nominees must be a citizen of the United States.
10/15/2022 4/1/2023	American Cancer Society	Research Grant	Up to \$200,000	Medical Research, Cancer	Discovery Boost Grants (DBG) support high-risk, high-reward exploratory cancer research across the research continuum. Investigators may focus on developing research methodologies, establishing feasibility, or leading pilot tests. It is expected that preliminary data generated from a completed DBG will have the potential to secure additional grant funding to further the research and open new and highly innovative areas for investigation.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/15/2022	Chiang Ching-kuo Foundation for International Scholarly Exchange	Research Grant	Up to \$50,000 (over 2 years)	Humanities, Social Sciences, China, Taiwan	The Foundation's grants provide support for research on Chinese Studies in the humanities and social sciences. Scholars at academic institutions are eligible to apply for research grants . Priority will be given to collaborative projects involving institutions in Taiwan. Projects on Taiwan Studies are especially encouraged. Full-time faculty at academic institutions may apply for Research Grants. An applicant who already has a two-year research grant is not eligible to apply for a CCK Grant for Scholars that would run concurrently with the research grant. The research grant must end before an applicant can apply for a CCK Grant for Scholars.
10/15/2022	Borchard Foundation Center on Law & Aging	Research Grant	Up to \$20,000	Public Policy, Public Health, Aging	The Academic Research Grant Program furthers scholarship about new or improved public policies, laws and/or programs that will enhance the quality of life for older adults. Fundable project are those that analyze and recommend changes to one or more important existing public policies, laws, and/or programs relating to older adults; or anticipate the need for and recommend new public policies, laws, and/or programs for older adults necessitated by changes in the number and demographics of the country's and the world's elder populations, by advances in science and technology, by changes in the health care system, or by other developments. Projects that are primarily educational or service-oriented will not be considered. The principal investigator must be U.S. citizen or legal resident of the U.S.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/15/2022	Endangered Languages Documentation Programme (ELDP)	Research Grant	<p>SG: £10,000 (~\$12,000)</p> <p>MDP: £10,000 - £150,000 (\$12,000 - \$1785,000) (over 6-36 months)</p> <p>LMG: £10,000 (~\$12,000)</p>	Languages	<p>ELDP provides grants for the documentation of endangered languages. Small grants (SG) can be used for a range of purposes related to the documentation of endangered languages, such as to carry out fieldwork, develop a pilot project, or complete a project already begun. Major Documentation Project (MDP) funding can cover elements including fieldwork costs, equipment, researchers' salaries, and graduate students' stipends (stipends should be included only for activities contributing to the project while in the field or processing the documentation materials). Legacy Material Grants (LMG) are offered to support the digitisation and archiving of legacy materials. The collections that are the target of these grants are in private hands or in small repositories without any access to resources for digitisation. The collections may include audio and video recordings (e.g., on tapes or reel to reel and so on), field notes, text collections and photographs.</p>
10/15/2022	The Miller Fund	Fellowship Grant	Up to \$45,000	Arts & Humanities	<p>The John William Miller Fellowship Fund supports book-length projects that examine Miller's thought or engage with his actualism in ways that are philosophically creative.</p>
10/15/2022	Rivkin Center for Ovarian Cancer	Research Grant	Up to \$30,000	Medical Research, Ovarian Cancer, Translational	<p>The Bridge Funding Award provides interim funding of up to \$30,000 for six months to researchers who have submitted to the National Institutes of Health (NIH) or an original proposal to the Department of Defense (DoD) pertaining to ovarian cancer and who were not funded but received a score close to the funding threshold. Investigators at all levels are encouraged to apply. Unfunded first submission NIH R01, R21, K08, K23, and K99 proposals (no A1 or A2 proposals) as well as original DoD proposals are eligible for consideration. NIH proposals must be eligible to be resubmitted using the current title and proposal number. Since DoD does not have a mechanism for resubmissions per se, the new submission should have the same research focus and similar aims as the original unfunded proposal. NIH proposals must have scored in the 20th percentile or lower, and DoD proposals must have scored 2.0 or less. Only current proposals will be considered. Proposals must have received their agency score within the past 9 months. Proposals must require at least six months of additional research work prior to resubmission to federal funding agency. Please do not apply if you are immediately resubmitting.</p>

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/15/2022 4/15/2023	Angelman Syndrome Foundation	Research Grant	Up to \$200,000 (over 2 years)	Medical Research, Angelman Syndrome, Translational	The Angelman Syndrome Foundation is calling for proposals for pilot projects to test new ideas about pathogenesis and therapeutics of Angelman syndrome, translational research and clinical research studies. Of particular interest to the ASF are studies related to communication, behavioral issues and identification of issues and treatments that impact the daily life of people with Angelman syndrome and their families.
10/15/2022	American Cancer Society	Research Grants	Up to \$120,000 (over 2 years)	Cancer Care Research, Public Policy, Palliative Care	RFA: Pilot and Exploratory Projects in Palliative Care of Cancer Patients and Their Families - Provides funding for investigators to perform pilot and exploratory research studies with the purpose of testing interventions, developing research methodologies, or exploring novel areas of research in palliative care for cancer patients and their families. This RFA is limited to applications that focus on palliative care research projects for seriously ill cancer patients and their families in 3 specific areas: 1. Exploring the relationship of pain and other distressing symptoms on quality and quantity of life, independence, function, and disability and developing interventions directed at their treatment in patients with advanced and chronic illnesses; 2. Studying methods of improving communication between cancer survivors living with serious illness with their families and health care providers; 3. Evaluating models and systems of care for patients living with advanced illness and their families.
10/15/2022	American Cancer Society	Research Grant	Up to \$660,000 (over 4 years)	Healthcare, Public Policy, Health Insurance	The American Cancer Society has put out an RFA: The Role of Health Policy and Health Insurance in Improving Access to and Performance of Cancer Prevention, Early Detection, and Treatment Services that evaluates the impact of the many changes now occurring in the healthcare system with a particular focus on cancer prevention, control, and treatment. Research to be funded by this RFA should focus on the changes in national, state, and/or local policy and the response to these changes by healthcare systems, insurers, payers, communities, practices, and patients.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/15/2022	American Cancer Society	Research Grant	\$660,000 (over 4 years)	Medical Research, Cancer, Translational, Early Career	The Research Scholar Grant (RSG) supports investigator-initiated projects across the cancer research continuum. Independent investigators in the first 6 years of an independent research career or faculty appointment are eligible to apply. Eligibility is extended for 8 years for clinician scientists who remain active in clinical care. Applicants typically must be within 12 years of receiving a terminal (doctorate) degree and cannot have more than one R01/R01-like grant (>\$100,000/year direct costs for more than 3 years) as principal investigator at the time of application.
10/19/2022	Wellcome	Research Grant	Up to £3 million ~(\$3.6 million) (over 5 years)	Medical Research, Sleep Science, Mental Health	Wellcome invites applications for its Mental Health Award : integrating sleep and circadian science into our understanding and treatment of anxiety, depression, and psychosis. This award will fund teams researching the interdependent roles of sleep and circadian rhythm disruptions in developing and resolving anxiety, depression, and/or psychosis. A more detailed understanding of the relationships between sleep, circadian rhythms, and mental health will enable better translation leading to new approaches for early detection and targeted intervention.
10/21/2022	Morris Animal Foundation	Research Grant	Up to \$150,000	Canine Health, Feline Health, Mitochondrial Function	The Morris Animal Foundation is pleased to announce they are accepting proposals for the study of interactions between mitochondrial function and chronic diseases in dogs or cats. Such diseases might include cognitive dysfunction syndrome, renal disease, unresponsive atopic dermatitis and dilated cardiomyopathy; although any diseases where mitochondrial dysfunction may play a role are of interest. Successful applications will focus on connection of mitochondrial energy function at the cellular level with systemic wellness.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/21/2022	Institute for Citizens and Scholars (formerly the Woodrow Wilson National Fellowship Foundation)	Fellowship Grant	Up to \$35,000	Arts & Humanities, Women & Minorities, Early Career	The Career Enhancement Fellowship Program seeks to increase the presence of minority junior faculty members and other faculty members committed to eradicating racial disparities in core fields in the arts and humanities. To be eligible, you must be, at the time of application, considered by your institution to be in the third year of the tenure-track teaching appointment; teaching in one of the designated fields (listen on the website), although interdisciplinary work will also be considered; completed no more than two years on the tenure track at another institution prior to joining your current institution; able to accept the Career Enhancement Fellowship in the upcoming academic year. Please note that the Fellowship must be continuous; and applicants must be U.S. citizens or permanent residents of the United States as of October 23, 2021 (include copy of green card if a permanent resident).
10/24/2022 (LOI)	American Sleep Medicine Foundation	Research Grant	Up to \$250,000 (over 1-3 years)	Medical Research, Sleep Disorders, Engineering, Machine Learning	The Strategic Research Award supports high-impact research projects aimed at addressing gaps in knowledge that impact the ability to provide optimal, patient-centered, cost-effective diagnosis and care for patients with sleep disorders. This is a focused request for applications (RFA) open to topic areas related to the following American Academy of Sleep Medicine (AASM) Strategic Plan goals: Technology Innovation and Advocacy to Improve Patient Care. Topic areas that address the AASM Strategic Plan goals must advance the field of sleep medicine and population sleep health.
10/25/2022	Retina Research Foundation	Research Grant	\$25,000 - \$50,000	Medical Research, Retina, Translational	The aim of the RRF pilot study grants is to allow investigators to perform retina research that will provide preliminary data that will allow successful submission for NIH or other major funding. Applicants must be U. S. citizens or green card/permanent U. S. residents.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/25/2022 (LOI)	Foundation Fighting Blindness	Research Grant	Up to \$600,000 (over 3 years)	Medical Research, Blindness, Translational	With the Free Family AMD Research Award , The Foundation Fighting Blindness will make an award for a meritorious research proposal that proposes to understand pathophysiologic mechanisms that cause the transition from aging to early, dry AMD. If successful, the research will inform the design of targeted treatment for the greatest number of people afflicted with early AMD and prevent blindness from late AMD. Proposals must: Focus on early, dry AMD; Determine the most relevant pathophysiologic pathways and their interactions with other pathways that cause early AMD lesions; Include two PIs with distinct areas of scientific expertise who will implement a multidisciplinary project with a team science approach on a topic that is not optimally served by a single laboratory; Use animal or cellular models that best address AMD pathobiology; Demonstrate that the outcome will have direct impact on AMD. Applicants must hold a Ph.D., M.D., D.M.D., D.V.M., D.O., or equivalent degree and have a faculty position or equivalent at a domestic or foreign: non-profit organization, or public or private institution, such as a university, college, medical school, hospital, research institute, or laboratory.
10/25/2022 (LOI)	Foundation Fighting Blindness	Research Grant	\$1,500,000 (over 3 years)	Medical Research, Macular Degeneration, Translational	The Research Core Award provides funding support to individuals or teams striving to identify, development, characterize and support relevant large animal models of inherited retinal disease (IRD) or dry age-related macular degeneration (dAMD) that are poorly modeled in rodents for which canine models do not currently exist, such as Stargardt disease and Usher syndrome. Applicants must hold a Ph.D., M.D., D.M.D., D.V.M., D.O., or equivalent degree and have a faculty position or equivalent at a domestic or foreign non-profit organization, or public or private institution, such as a university, college, medical school, hospital, research institute, or laboratory.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/25/2022	BrightFocus Foundation	Research Grant	\$200,000 (over 2 years)	Medical Research, Glaucoma, Translational Research	The National Glaucoma Research Grant provides funds for researchers pursuing pioneering research leading to greater understanding, prevention, and treatment of glaucoma. Preference is made for exciting pilot projects that would not, at their present stage, be competitive for large government or industry awards. Please note that applicants to the NGR program are encouraged to apply for funding to create tools that would benefit all investigators in the field, including animal models of disease, or cell lines.
10/26/2022	The Marfan Foundation	Award	Innovators: \$100,000 (over 2 years) Career Development: \$100,000 (over 2 years)	Medical Research, Marfan Syndrome, Translational	The Marfan Foundation provides financial support for investigators studying any or all disciplines involving Marfan syndrome and related conditions. The Innovators Award is for faculty members to explore an innovative concept in “translational” science that has applicability to improving human health. Examples could include fundamental research, clinical research, diagnostic tests, biomarkers, biomedical engineering advances, and imaging advances. Collection of data for improved evidence-based medical guidance are of great interest. The Career Development Award is designed to support investigators early in their career to derive preliminary data in a key concept area that has high potential to lead to extended funding from NIH, EU, and other large research funding sources.
10/27/2022 (LOI)	Foundation Fighting Blindness	Research Grant	Up to \$300,000 (over 3 years)	Medical Research, Blindness, Translational	Individual Investigator Research Awards are designed to concentrate research in areas with the greatest potential to move toward treatments and cures for the inherited orphan retinal degenerative diseases and dry age-related macular degeneration. This opportunity seeks candidates that hold a Ph.D., M.D., M.D./Ph.D., D.M.D., D.V.M., D.O., or equivalent degree and have a faculty position or equivalent at a domestic or foreign: non-profit organization, or public or private institution, such as a university, college, medical school, hospital, research institute, or laboratory.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/31/2022	Barth Syndrome Foundation	Research Grant	<p>Idea: Up to \$50,000 (over 1-2 years)</p> <p>Development: Up to \$100,000 (over 2-3 years)</p>	Medical Research, Barth Syndrome, Translational	The Barth Syndrome Foundation (BSF) welcomes innovative applications that address the basic, translational, and clinical research challenges of Barth syndrome. Through this program, BSF seeks to provide seed grant funding to young and established investigators in order to generate the preliminary data required for successful follow-on funding available from major grant-making institutions such as the National Institutes of Health (NIH). Idea applications are well-suited for basic research/discovery science applications and have a lower threshold for the amount of preliminary data required compared to Development applications. Development applications have a higher threshold of preliminary data and are ideally suited for proposals with clear implications for therapeutic development. Applicants must be independent investigators (e.g. faculty appointment).
10/31/2022 (LOI)	Alfred P. Sloan Foundation Gordon and Betty Moore Foundation John Templeton Foundation Simons Foundation	Research Grant	Up to \$5 Million (over 5 years)	Physics	With the Call for Letters of Intent: Small-scale Experiments that Advance Fundamental Physics , The Alfred P. Sloan Foundation, the Gordon and Betty Moore Foundation, the John Templeton Foundation, and the Simons Foundation invite applications to a one-time call aimed at advancing fundamental physics by funding small-scale experiments that explore physics which has typically been explored at large-scale facilities (e.g., CERN, LIGO). The program is intended to support high-risk and potentially high-return small-scale experimental projects aimed at new ambitious discoveries beyond the current frontier of fundamental physics. "Small-scale" refers to table-top size experiments or to ones that could fit in a typical university physics research lab. Examples of such projects include, but are not limited to, tests of basic principles of quantum physics, tests of interaction laws and established symmetry principles, and searches for new particles.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
10/31/2022	The Mohamed bin Zayed Species Conservation Fund	Research Grant	Up to \$25,000	Conservation, Environment	The Mohamed bin Zayed Species Conservation Fund was established to provide targeted grants to individual species conservation initiatives, recognize leaders in the field and elevate the importance of species in the broader conservation debate. Its focus is global and eligibility for grants will extend to all plant, animal and fungi species conservation efforts, without discrimination on the basis of region or selected species. The Fund is primarily interested in in situ species conservation work, but will consider applications for an ex situ project where it is demonstrated to be critical to the survival of the species concerned. Anyone directly involved in species conservation can apply to the Fund for a grant.
11/1/2022 6/1/2023	Kurt Weill Foundation for Music	Programmatic Grant	Up to \$15,000	Music Performance	Funding may be requested by colleges and universities in support of general production expenses for performances of Kurt Weill's and/or Marc Blitzstein's stage works, and to cover musical expenses in connection with performances of Weill's or Blitzstein's concert works. All works must be presented in their original versions and orchestrations or in authorized arrangements. Other more specific restrictions and guidelines are listed on the funders website.
11/1/2022 5/1/2023	Lalor Foundation	Programmatic Grant	Up to \$35,000	Public Health, Sex Education	The Anna Lalor Burdick Program supports programs that offer sexual and reproductive health education to young women. It is interested in programs serving young women who are disadvantaged by poverty, discrimination, geographic isolation, lack of comprehensive sex education, hostile public policy, or other factors leading to inadequate sexual and reproductive health. The ALB Program is particularly interested in supporting new programs or initiatives, or innovations in successful programs. While projects may take place outside the U.S., only organizations based in the United States are eligible.
11/1/2022	Alpha Phi Foundation	Research Grant	\$100,000	Medical Research, Translational	The Heart to Heart Grant supports research and education to lessen the impact of heart disease in women. The grant proposal should provide a complete explanation of the project's rationale and proposed activities.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
11/1/2022 (Eligibility Determination)	Leukemia & Lymphoma Society	Award	\$600,000 (over 5 years)	Cancer, Leukemia, Translational, Early Career	Career Development Program (CDP) grants support researchers early and at different stages of their career. The grants are designed to encourage these promising young investigators to embark on academic careers, offering researchers the opportunity to take part in basic, translational, or clinical research to help understand and treat blood cancers and relevant premalignant conditions. The Scholar Award is for 5 years and supports tenure-track, junior faculty who have already established themselves as blood cancer researchers. Scholar applicants must: Have a Sponsor who will attest to institutional support for the applicant; Be a tenure-track independent investigator of at least an assistant professor position or equivalent; Have adequate funding to support the proposed research; Have started their first independent position no less than 2 years but not more than 8 years before the time of review; Have at least one full length (which may include short reports), peer-reviewed, primary research, corresponding author publication available on PubMed by the application due date as an independent investigator.
11/1/2022	Loeb Classical Library Foundation	Fellowship Grant	Up to \$35,000	Arts & Humanities	The Loeb Classical Library Foundation Fellowship supports research, publication, and other projects in the area of classical studies. Fellowships may be used for a wide variety of purposes. Examples include publication of research, enhancement of sabbaticals, travel to libraries or collections, dramatic productions, excavation expenses, or cost of research materials.
11/1/2022 (LOI)	Pulmonary Fibrosis Foundation	Research Grant	Up to \$50,000 (over 2 years)	Medical Research, Pulmonary Fibrosis, Translational, Early Career	The Pulmonary Fibrosis Foundation Scholars program will engage emerging researchers in the field of pulmonary fibrosis (PF), an incurable lung disease. With the goal of advancing research that could translate into successful therapies for PF, the PFF Scholars program is designed to support and enable promising researchers to obtain independent funding and continue their cutting-edge research. Those who have held a faculty appointment for more than 7 years are not eligible.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
11/1/2022	Mitsubishi Electric America Foundation	Programmatic Grant	\$10,000 - \$100,000 (over 3 years)	Youth with Disabilities, Employment, Veterans	Mitsubishi Electric America Foundation supports innovative projects that help youth with disabilities develop the leadership and employment skills they need to succeed, particularly for careers in science, technology, engineering, arts & design, and mathematics (STEAM). MEAF will also consider projects to create tools that help break down barriers to employment and increase job opportunities for young people with disabilities entering the workforce, including returning veterans with disabilities.
11/1/2022	American Chemical Society	Award	\$175,000	Organic Chemistry	The purpose of the Arthur C. Cope Scholar Awards is to recognize and encourage excellence in organic chemistry. Ten Arthur C. Cope Scholars will be named annually in three categories: two who have less than ten years of experience since their terminal degree will receive the Arthur C. Cope Early Career Scholars Award; four who have 10 to 25 years of experience since their terminal degree will receive the Arthur C. Cope Mid Career Scholars Award; and four who have 25 plus years of experience since their terminal degree will receive the Arthur C. Cope Late Career Scholars Award. No individual may receive a second Arthur C. Cope Scholar Award. Recipients of an Arthur C. Cope Award are ineligible to be named an Arthur C. Cope Scholar.
11/1/2022	Archaeological Institute of America	Programmatic Grant	\$15,000	Archaeology, Historic Preservation	The Site Preservation Grant is intended to fund projects that uphold the AIA's mission to preserve and protect the world's archaeological heritage for future generations. The goal of the grant is to enhance global preservation efforts and promote awareness of the need to protect threatened archaeological sites. The AIA seeks to support projects that not only directly preserve archaeological sites, but those that also include public outreach and education components that create a positive impact on the local community, students, and the discipline of archaeology as a whole.

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
11/1/2022	BrightFocus Foundation	Research Grant	\$300,000 (over 3 years)	Medical Research, Alzheimer's Disease, Translational Research, Early Career	Alzheimer's Disease Research Programs provide funds for researchers pursuing pioneering research leading to greater understanding, prevention, and treatment of Alzheimer's disease. Preference is made for exciting pilot projects that would not, at their present stage, be competitive for large government or industry awards. Typically, these awards are made to early stage investigators, or to more established investigators who are proposing particularly innovative research. Fellowships are limited to researchers within 5 years of doctoral degree conferral (or end of residency). All other applicants are encouraged to apply for a standard award.
11/1/2022 (LOI)	Simons Foundation	Research Grant	Up to \$8 million (over 4 years)	Mathematics, Physical Sciences	The aim of the Simons Collaborations in Mathematics and Physical Sciences program is to stimulate progress on fundamental scientific questions of major importance in mathematics, theoretical physics and theoretical computer science. A Simons Collaboration in MPS should address a mathematical or theoretical topic of fundamental scientific importance, where a significant, new development creates a novel area for exploration or provides a new direction for progress in an established field. The project should involve outstanding researchers with a range of career stages. Excellence of the scientific leadership is one of the main criteria in the selection process. The collaboration director must hold a tenured faculty, or equivalent, position at a U.S. or Canadian institution with a Ph.D. program in the director's department. PIs must hold a tenured or tenure-track faculty, or equivalent, position at an educational institution.

11/2/2022	American Academy of Neurology	Prize	\$50,000	Medical Research, Translational	Sheila Essey Award recognizes an individual who has made significant research contributions in the search for the cause, prevention of, and cure for amyotrophic lateral sclerosis (ALS). The criteria being used to determine the recipient include recent major scientific impact, long-term scientific impact, and overall impact to ALS. The applicant must be actively engaged in ALS research.
11/2/2022	Russell Sage Foundation (RSF)	Research Grant	\$30,000	Social Science, Public Policy, Racism, COVID-19 (non-medical), Early Career	With the Pipeline Grants Competition , RSF seeks to advance innovative research on economic mobility and access to opportunity in the United States. They are interested in research focused on structural barriers to economic mobility and how individuals, communities and state entities understand, navigate and challenge systemic inequalities. This initiative will support early-career tenure-track scholars and promote diversity by prioritizing applications from scholars who are underrepresented in the social sciences. This includes racial, ethnic, gender, disciplinary, institutional, and geographic diversity. Assistant professors (tenure and non-tenure track) are eligible who have not previously received a research grant or a visiting fellowship from RSF.
11/3/2022 (Intent to Apply) Limited Submission: Apply through Research Acceleration Office	Simons Foundation	Research Grant RAO Limited Submission	\$500,000- \$1,920,000 (over 5-10 years)	Mathematics, Physics, Computer Science	Furthermore grants in publishing supports publication of nonfiction books that concern the arts, history, and the natural and built environment. They look for work that appeals to an informed general audience, gives evidence of high standards in editing,

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
11/9/2022 (LOI)	Russell Sage Foundation	Research Grant	Up to \$175,000	Social Science, Political Science, Economics, Sociology, Psychology	<p>Proposals are sought in several areas: Social, Political and Economic Inequality seeks research on whether rising economic inequality has affected social, political, and economic institutions, and the extent to which increased inequality has affected equality of opportunity, social mobility, and the intergenerational transmission of advantage. They seek investigator-initiated research projects that will broaden our understanding of the causes and consequences of rising economic inequalities in the United States. Future of Work supports innovative research on the causes and consequences of changes in the quality of jobs for less- and moderately-skilled workers and their families. They seek investigator-initiated research proposals that will broaden understanding of the role of changes in employer practices, the nature of the labor market and public policies on the employment, earnings, and the quality of jobs of workers. Behavioral Science and Decision Making in Context encourages perspectives from multiple disciplines, including economics, psychology, political science, sociology, law, public policy, and other social sciences, to further our understanding of economic, social, political, and psychological decision-making processes, attitudes, behaviors, and institutional practices in public and private contexts such as policing/criminal legal systems, employment, housing, politics, racial/ethnic relations, and immigration. Race, Ethnicity, and Immigration seeks investigator-initiated research proposals on the social, economic, and political effects of the changing racial and ethnic composition of the U.S. population, including the transformation of communities and ideas about what it means to be American. They are especially interested in innovative research that examines the roles of race, ethnicity, nativity, and legal status in outcomes for immigrants, U.S.-born racial and ethnic minorities, and native-born whites. Immigration and Immigrant Integration seeks to support innovative research on the effects of race, citizenship, legal status and politics, political culture and public policy on outcomes for immigrants and for the native-born of different racial and ethnic groups and generations.</p>

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
11/14/2022	Foundation Fyszen	Prize	€ 100,000	Psychology, Neurobiology, Anthropology, Archaeology, Humanities	The 2022 Fyszen International Prize will be awarded for research in: Modelling of Cognitive Function. The prize will be awarded to a scholar who has significantly advanced our understanding of the relationship between technology and techniques, evolution and transmission in human populations. The candidate must be proposed by a renowned scientific personality.
11/15/2022 (LOI)	Cancer Research Institute	Research Grant	Up to \$200,000 (over 1-2 years)	Cancer, Technology Development	The Cancer Research Institute Technology Impact Award provides seed funding to address the gap between technology development and clinical application of cancer immunotherapies. These grants aim to encourage collaboration between technology developers and clinical cancer immunologists and to generate the proof-of-principle of a novel platform technology in bioinformatics, <i>ex vivo</i> or <i>in silico</i> modeling systems, immunological or tumor profiling instrumentation, methods, reagents and assays, or other relevant technologies that can enable clinician scientists to generate deeper insights into the mechanisms of action of effective or ineffective cancer immunotherapies. Applicants must hold a faculty appointment as a tenure-track assistant professor (or higher rank) at the time of award activation.
11/15/2022 (LOI) 3/15/2023 (LOI)	National MPS Society	Research Grant	Tier I: Up to \$200,000 (over 2-4 years) Tier II: Up to \$100,000 (over 2-4 years)	Medical Research, MPS, Translational	The National MPS Society funds research that may lead to treatments for MPS diseases and solicits applications for innovative research projects that involve basic research, translational studies and clinical research. The Society welcomes submissions of any type, but specifically seeks applications in the current cycle that address those topics listed on their website. Tier I - This award will address complex or multidisciplinary research questions and/or unmet needs in basic, translational, clinical, or diagnostic aspects of the MPS and ML disorders. Tier II - These awards may address any of the following: discreet studies or deliverables involving drug repurposing, models, etc.; research needs designed to make possible a significant and new research grant; research needs designed to improve a resubmission of a significant research grant; analysis of previously compiled data or research resources; pre-clinical extension to an alternate syndrome of a previously validated therapy.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
11/15/2022	American Foundation for Suicide Prevention	Research Grant	Distinguished: \$125,000 Standard: \$100,000 Young Invest: \$85,000 Pilot: \$30,000	Suicide, Social Science, Psychology	Proposals are sought for a variety of Innovation grant programs. Distinguished Investigator Grants provide funding for investigators at the level of associate professor or higher with an established record of research and publication on suicide. Standard Research Innovation Grants provide funding for research to contribute to the understanding and ultimate prevention of suicide, or to the treatment of suicidal individuals. Young Investigator Innovation Grants provide funding to assist new researchers to obtain the advice, guidance and supervision of an established mentor in a selected area of suicide research. Someone who is or has been a PI on an NIH/NIMH research grant or its equivalent does not qualify as a Young Investigator. Pilot Innovation Grants provide funding to provide seed money for projects that show promise in opening up new areas of suicide research. Grants are not intended to support the development or implementation of prevention programs, educational programs, treatments, or other interventions that do not have a significant research component.
11/15/2022 (LOI) 3/1/2023 (LOI) 6/1/20223 (LOI)	The Retirement Research Foundation	Research Grant	Up to \$250,000	Retirement, Aging, Advocacy	Proposals are sought for RRF's Responsive Grants Programs . The areas of interest include advocacy, direct service, professional education and training, and research seeking causes and solutions to significant problems for older adults.
11/15/2022 (Concept Paper) 5/15/2023 (Concept Paper)	Gerber Foundation	Research Grant	Up to \$350,000 (over 3 years)	Health, Nutrition, Human Development, Infants, Youth	The foundation awards grants for research projects focused on issues faced by care providers that, when implemented, will improve health, nutrition, and/or developmental outcomes for infants and young children. Projects may address etiologic mechanisms of disease; new, improved, or less invasive diagnostic procedures; reduction or elimination of side effects; alleviation of symptoms; new, improved, or less invasive therapies or treatments; dosage or dosing requirements or mechanisms for drugs, nutrient supplementation, or other therapeutic measures (under or overdosing); and preventative measures. Priority is given to projects offering a substantial promise of meaningful advances in prevention and treatment of diseases, as well as those with broad applicability to the general population on a regional or national level.

11/16/2022	U.S. – Israel Binational Science Foundation	Research Grant	<p>BSF Research Grant: Up to \$250,000 (over 2-4 years)</p> <p>Start Up Grant: \$75,000 (over 2 years)</p>	Physical Science, Social Science, Early Career	<p>The BSF Research Grants Program funds both U.S. and Israeli scientists who wish to work together. Applications to the program are made jointly by U.S. and Israeli researchers. No prior collaboration is required, but the synergy between the researchers must be evident. For 2022, the following areas of research will be eligible for funding: Exact and Physical Sciences, Social Sciences. The Start-Up Grant Program is meant to help newly appointed researchers who are beginning their independent research careers and may not yet have initial results to substantiate their application. It is implemented within the framework of the regular BSF Research Grants program, i.e., it must exhibit scientific excellence, have a strong element of cooperation between Israeli and American scientists, and fall within the areas of research supported in that year by the BSF. At least one of the principal investigators should have attained his/her Ph.D., M.D. degree or equivalent, no more than ten years prior to submitting his/her proposal.</p>
11/16/2022	The Robert H. N. Ho Family Foundation	Grant	Up to \$50,000	Buddhism, Translation	<p>Translation Grants in Buddhist Studies support translations of important Buddhist texts for the benefit of contemporary audiences who currently do not have access to them in their own languages. Applicants may propose work including, but not limited to, translation of canonical texts into modern vernaculars or the translation of scholarly works on Buddhism from one modern language into another.</p>

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
11/18/2022	Arnold and Mabel Beckman Foundation	Grant	Up to \$1 Million	Engineering, Atmospheric Science, Chemistry, Mass Spectrometry	The Arnold and Mabel Beckman Foundation is requesting proposals for a grant opportunity for the development of new instrument designs to bring the most advanced mass spectrometry detection capabilities and sensitivity levels into a lightweight, inexpensive, and easily operated system that could be portable or deployed on airborne platforms, in unattended monitoring stations, or operated by citizen scientists, for long-term analysis of the chemical composition of the atmosphere. The intent of this program is to support scientists, with a focus on undergraduates, to become inventors and innovators in this compelling area of research by building tools and instruments. Miniaturizing mass spectrometers has been an active area of research for many years, and it is timely to advance such prototype designs for broader applications for mobile monitoring. If successful, these prototype monitoring systems could have a lasting impact on informing policy decisions on sources of pollution, improving indoor and outdoor air quality, and furthering the democratization of access to clean air around the world.
11/30/2022	Nasdaq Foundation	Programmatic Grant	Unlimited (Most grants under \$100k)	Financial Literacy, Women and Underrepresented Communities	The Nasdaq Foundation invites applications to its quarterly grant program, which will award funding to empower diverse investors such as organizations or programs that enhance financial literacy among women and underrepresented communities or improve access to knowledge and tools among women and underrepresented communities; and to support diverse entrepreneurs with the resources to strengthen and scale their businesses and contribute to the prosperity of society, including organizations and programs that equip women and diverse founders with mentoring and resources, and improve access to capital for women and diverse founders.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
12/1/2022	American Society of Transplantation	Research Grant	Up to \$150,000 (over 2 years)	Medical Research, Transplantation, Translational, Early Career	The purpose of Career Development Grants is to foster the training of early career investigators who have the potential to contribute to transplant science/immunobiology and/or treatment of transplant recipients. The grants encourage continued commitment of high-quality applicants to their careers in transplantation. Faculty Development Research Grants are intended for young independent investigators within the first five (5) years of their first faculty appointment, encouraging them to expand on preliminary research findings that will become the basis for individual research or career development awards from the NIH, VA, or equivalent agencies.
12/1/2022 4/1/2023	Brady Education Foundation	Research Grant	Up to \$100,000 per year	Education	The Brady Education Foundation pursues its mission by promoting collaboration between researchers and educators via the funding of program development and program evaluations in education. The Foundation is currently accepting proposals focused on evaluating programs that have the potential of helping to close the opportunity and resulting achievement gaps associated with race and family income.
12/1/2022	Rivkin Center for Ovarian Cancer	Research Grant	Pilot: \$75,000 (over 1 years) Scientific Scholar: \$120,000 (over 2 years)	Medical Research, Ovarian Cancer, Translational, Early Career	The Rivkin Center has multiple streams of funding to support ovarian cancer research. Pilot Study Program awards will support investigator initiated projects in all areas of ovarian cancer research. In addition, projects designed to analyze data from already funded clinical trials will be considered. Scientific Scholar Awards are intended to assist promising laboratory and clinical scientists in pursuing a career as an independent investigator in ovarian cancer research. Candidates should be at the post-doc/fellow, instructor, research assistant, or assistant professor level with no more than 3-4 years in any of these positions.
12/1/2022	IBM Center for The Business of Government	Research Grant	\$20,000	Social Science, Government Management, Public Policy	The aim of the IBM Center for The Business of Government is to tap into the best minds in academe and the nonprofit sector who can use rigorous public management research and analytic techniques to help public sector executives and managers improve the effectiveness of government. They are looking for very practical findings and actionable recommendations - not just theory or concepts - in order to assist executives and managers to more effectively respond to mission and management challenges.

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
12/15/2022	American Lung Association	Research Grant	<p>Innovation: Up to \$150,000 (over 2 years)</p> <p>Catalyst: Up to \$100,000 (over 2 years)</p> <p>Public Policy: Up to \$100,000 (over 2 years)</p> <p>Dalsemer: Up to \$100,000 (over 2 years)</p>	Medical Research, Lung Health, Public Policy, Translational	<p>The Innovation Award will support promising independent investigators who are leveraging their existing body of work to conduct basic science, behavioral, clinical, or translational research for lung health. The applicant must have held a K or R level grant in the 3 years prior to the application. Individuals who have been PI on two or more large federal research grants (even those with multiple PIs) in their career are not eligible to apply. The Catalyst Award champions the next generation of scientists who are ascending toward independence by supporting mentored-investigators who are conducting basic science, behavioral, clinical or translational research into lung health. This award is intended to support investigators prior to receipt of career-development awards, like K08, K23, K99 or similar career development award. The Public Policy Research Award is designed to help stimulate and inform important public policy debates around healthy air and lung disease. This award supports research on and evaluation of existing public policy and programs, as well as projects that inject innovative ideas into public policies impacting lung health. Applicants should be on-track to pursue a career in public policy research. The application is open to researchers in public policy, economics, political science, sociology, law, and related disciplines. The Dalsemer Award is a mentored award meant to provide seed monies to junior investigators for researching the mechanisms and biology of interstitial lung disease. Applicants should be on-track to pursue a career in lung disease research with a mentor who has a demonstrated history of research experience and mentorship.</p>
12/15/2022 (LOI) 3/1/2023 (LOI)	Samuel H. Kress Foundation	Research Grant	Up to \$100,000	Visual Arts, Art History, Art Education	<p>The History of Art program supports scholarly projects that will enhance the appreciation and understanding of European art and architecture. Grants are awarded to projects that create and disseminate specialized knowledge, including archival projects, development and dissemination of scholarly databases, documentation projects, museum exhibitions and publications, photographic campaigns, scholarly catalogues and publications, and technical and scientific studies. Grants are also awarded for activities that permit art historians to share their expertise through international exchanges, professional meetings, conferences, symposia, consultations, the presentation of research, and other professional events.</p>

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
12/15/2022 (LOI) 3/1/2023 (LOI)	Kress Foundation	Programmatic Grant	Up to \$25,000	Visual Arts, Art History, Art Preservation	The Conservation program supports the professional practice of art conservation, especially as it relates to European art of the pre-modern era. Grants are awarded to projects that create and disseminate specialized knowledge, including archival projects, development and dissemination of scholarly databases, documentation projects, exhibitions and publications focusing on art conservation, scholarly publications, and technical and scientific studies. Grants are also awarded for activities that permit conservators and conservation scientists to share their expertise with both professional colleagues and a broad audience through international exchanges, professional meetings, conferences, symposia, consultations, the presentation of research, exhibitions that include a prominent focus on materials and techniques, and other professional events.
12/15/2022	Melanoma Research Foundation	Research Grant	Up to \$100,000	Medical Research, Melanoma, Translational, Mid-Career	In response to a growing need in the field, the Melanoma Research Foundation has established its Mid-Career Bridge Grant to support investigators who are dedicated to melanoma research. This award will be for established researchers with pre-existing R01s, who have applied for a NIH R01 grant that was scored, but not funded. Applicants must be within 12-years of obtaining their first independent position (e.g. as an instructor, assistant professor, etc.) AND previously held a R01 during this time period. Applicants must have submitted a NIH R01 application within the past 6 months that was scored but not funded. The 6-month timeframe begins the date the R01 was reviewed by the NIH study section. The MRF will accept either an original R01 or a resubmission application as the underlying basis for this award. The scored, but not funded NIH R01, must have achieved a percentile of 30 or lower/better on the A0 application. P01s/R21s/etc. will not be eligible for this grant mechanism. The applicant must be the contact Principal Investigator (PI) on the original R01 to qualify for this award. The application must focus on melanoma research.

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
12/15/2022	Rita Allen Foundation	Award	\$150,000 (over 3 years)	Medical Research, Pain, Early Career	The Rita Allen Foundation Award in Pain , recognizes emerging leaders in basic pain research whose work holds high potential for uncovering new pathways to improve the treatment of chronic pain. Candidates should be in the early stages of their career, with an appointment at the faculty level, yet prior to achieving tenure.
2/15/2023 6/15/2023	Colorado Health Foundation	Programmatic Grant	~\$200,000 (average award)	Mental Health, Substance Abuse, Community Programs	The Supporting Coloradans in Recovery Through Non-clinical Programs opportunity will support individuals with mental health and/or substance use challenges in accessing non-clinical support services close to home that will make recovery possible. Through this funding opportunity, the Foundation is interested in strengthening non-clinical recovery support programs that focus on the community and purpose dimensions of the Substance Abuse and Mental Health Services Administration's (SAMHSA's) model of recovery.
12/16/2022 4/15/2023	Searle Freedom Trust	Research Grant	\$25,000 - \$300,000	Public Policy	The Searle Freedom Trust is primarily interested in supporting domestic public policy research. Recognizing that good policymaking relies on the availability of high-quality research, the foundation invests primarily in scholarship that results in the publication of books, journal articles, and policy papers. Funding is typically provided in the form of research grants, fellowships, and other types of targeted project support.
12/31/2022 4/30/2023	The Elsa U. Pardee Foundation	Research Grant	Up to \$200,000	Medical Research, Cancer	The foundation funds research directed toward new treatments or cures for cancer. They particularly encourage grant applications for a one-year period which allows establishment of capabilities of new cancer researchers, or new cancer approaches by established cancer researchers. Project relevance to cancer detection, treatment or cure should be clearly identified.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
1/5/2023	Pfizer	Research Grant	Unlimited	Medical Research, Oncology, Translational	Pfizer supports Investigator Sponsored Research (ISR) projects that advance medical and scientific knowledge about their therapies. This grant type is used as support for pre-clinical and clinical studies (including interventional and non-interventional), that involve a Pfizer asset (e.g., commercial drug, investigational drug, pure compound). Pfizer also supports general research projects focused on the development or refinement of specific and defined medical knowledge unrelated to a Pfizer asset. A list of Oncology assets available for ISR proposals, including Areas of Interest, are available on www.Pfizer.com/ISR
1/6/2023 (Pre-proposal)	Burroughs Wellcome Fund	Research Grant	\$500,000 (over 5 years)	Biological Science, Early Career	The Career Awards at the Scientific Interface bridge advanced postdoctoral training and the first three years of faculty service. These grants are intended to foster the early career development of researchers who have transitioned or are transitioning from undergraduate and/or graduate work in the physical/mathematical/computational sciences or engineering into postdoctoral work in the biological sciences, and who are dedicated to pursuing a career in academic research. Candidates must hold a Ph.D. degree in one of the fields of mathematics, physics, chemistry, computer science, statistics, or engineering. Candidates must have completed at least 12 months but not more than 60 months of postdoctoral research by the date of the full invited application deadline. (See website for full eligibility requirements.)
1/31/2023 (LOI)	The Marfan Foundation	Research Grant	\$800,000 (over 4 years)	Medical Research, Marfan Syndrome, Translational	The Everest Grant is a large, multi-institutional transformational grant designed to “reach the summit” on a critical path to a breakthrough in basic or translational science that has direct relevance to human health. It must include an institutionally funded graduate student or fellow. Engagement of multi-disciplinary investigators or pharma would be highly desirable.
2/15/2023 (LOI)	Friedreich's Ataxia Research Alliance	Research Grant	Up to \$300,000 (over 2 years)	Medical Research, Neuroscience, Early Career	General Research Grants are open to qualified investigators proposing projects that fall within FARA Research Priorities: advancing understanding of neuroscience, advancing understanding of cardiac disease in FA, advance drug discovery, facilitate the drug development process and translational research, and advance clinical research. FARA encourages applications from junior investigators and young clinicians.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
3/1/2023 (LOI)	Samuel H. Kress Foundation	Programmatic Grant	Up to \$50,000	Visual Arts, Art History, Art Education	The Digital Art History Program is intended to foster new forms of research and collaboration and new approaches to teaching and learning. Support may be offered for the digitization of important visual resources (especially art history photographic archives) in the area of pre-modern European art history; of primary textual sources (especially the literary and documentary sources of European art history); for promising initiatives in online publishing; and for innovative experiments in the field of digital art history. Please note that this grant program does not typically support the digitization of museum object collections.
3/1/2023	J.M. Kaplan Fund	Publication Grant	\$1,500 - \$15,000	Arts and Humanities, History, Book Publishing	Furthermore grants in publishing supports publication of nonfiction books that concern the arts, history, and the natural and built environment. They look for work that appeals to an informed general audience, gives evidence of high standards in editing, design, and production, and promises a reasonable shelf life. Book projects to which a university press, nonprofit or trade publisher is already committed and for which there is a feasible distribution plan are usually preferred. You must apply at least three months before the anticipated press date.
Rolling	Open Philanthropy	Grant	\$30,000 - \$50,000	Course Development, AI, Pandemic Preparedness, Biosecurity, Philosophy	Open Philanthropy is looking to fund the development of courses on a range of topics that are relevant to certain areas of their grantmaking that form part of their work to improve the long-term future (potential risks from advanced AI, biosecurity and pandemic preparedness, other global catastrophic risks), or to issues that are of cross-cutting relevance to their work. They are primarily looking to fund the development of new courses, but they are also accepting proposals from applicants who are looking for funding to turn courses they have already taught in an in-person setting into freely-available online courses.
Rolling	Alzheimer's Drug Discovery Foundation	Research Grant	Exploratory: Up to \$250,000 Proof of Principle: Up to \$500,000	Medical Research, Diagnostics, Alzheimer's Disease	The Diagnostics Accelerator challenges the research community to develop cutting-edge biomarkers and explore novel diagnostic technologies that will aid in Alzheimer's diagnosis and clinical trial design. The Peripheral Biomarkers RFP is seeking solutions using blood and other peripheral markers, including saliva, urine, and ocular biomarkers. The Digital Biomarkers RFP is seeking solutions using a variety of digital platforms such as portables, sensors, or software.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
Rolling	Emily Davie and Joseph S. Kornfeld Foundation	Research Grant	Up to \$200,000	Medical Research, Education, Bioethics	The Emily Davie and Joseph S. Kornfeld Foundation's interests include bioethics, palliative care, medical research and education. The Foundation funds specific programs and projects and general operating support. It does not support capital or endowment campaigns. Grants in the past have been offered in the areas of ALS research, community service, palliative care, education, and more.
Rolling	A-T Children's Project	Research Grant	Up to \$150,000 (over 2 years)	Medical Research, Ataxia-Telangiectasia, Translational	The A-T Children's Project provides competitive awards for basic science, translational and clinical research grants related to ataxia-telangiectasia. Scientific excellence and relevance to A-T are the paramount criteria used to select supported research projects. A-TCP's current focus is on funding innovative research strategies that look at A-T in new ways and that include a clear "yes" or "no" answer to the hypotheses rather than merely defining a mechanism. Highest priority is given to projects that, while drawing on basic discoveries, include creative strategies for suggesting and evaluating specific disease-modifying and symptomatic interventions.
Rolling (LOI)	Lennox-Gastaut Syndrome Foundation	Research Grant	\$75,000 (over 2 years)	Medical Research, Lennox-Gastaut Syndrome	The Lennox-Gastaut Syndrome Foundation has launched a new Cure LGS 365 Research Grants Program , and through the program, researchers may submit letters of intent 365 days a year, and the program will fund worthy projects within two months of submission.
Rolling (Reviewed Quarterly Through 8/30/2023)	Burroughs Wellcome Fund	Research Grant	Up to \$50,000	Climate Change, Human Health, Economics, Interdisciplinary	With Climate Change and Human Health Seed Grants , the Burroughs Wellcome Fund aims to stimulate the growth of new connections between scholars working in largely disconnected fields who might together change the course of climate change's impact on human health. They are particularly but not exclusively interested in activities that build connections between basic/early biomedical scientific approaches and ecological, environmental, geological, geographic, and planetary-scale thinking, as well as with population-focused fields including epidemiology and public health, demography, economics, and urban planning. This call focuses on developing partnerships. Proposals from single institutions must develop partnerships that do not already occur naturally. This program does not support biomedical research projects proposed by individual investigators.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
Rolling	Social Science Research Council	Research Grant	\$10 Million in total funding	Social Science, Misinformation, Public Policy, COVID-19	The Mercury Project will provide research grants over a three-year period to researchers and organizations for the purpose of: a) estimating the causal impacts of mis- and disinformation on online and offline outcomes in the context of the Covid-19 pandemic, including health, economic, and/or social outcomes, differential impacts across socio-demographic groups, and quantifying the global costs of those impacts; b) estimating the causal impacts of online or offline interventions in the United States, Africa, Asia, and Latin America to increase uptake of Covid-19 vaccines and other recommended public health measures by countering mis- and disinformation, including interventions that target the producers or the consumers of mis- and disinformation, or that increase confidence in reliable information.
Rolling	Robert Wood Johnson Foundation	Research Grant	Unlimited	Health, Racial Equity, Public Policy	Evidence for Action (E4A) , a national program of the Robert Wood Johnson Foundation, funds research that expands the evidence needed to build a Culture of Health, with an explicit emphasis on advancing racial equity. This funding is focused on studies about upstream causes of health inequities, such as the systems, structures, laws, policies, norms, and practices that determine the distribution of resources and opportunities, which in turn influence individuals' options and behaviors. Research should center on the needs and experiences of communities exhibiting the greatest health burdens and be motivated by real-world priorities. It should be able to inform a specific course of action and/or establish beneficial practices, not stop at characterizing or documenting the extent of a problem.
Rolling	Internet Society Foundation	Research Grant	Up to \$200,000 (over 2 years)	Computer Science, Social Science, Economics, Ecology	The Internet Society Foundation has announced a new grants program in support of researchers worldwide who are studying the future and sustainability of the Internet. Through the program, grants are available for research focused in one of two categories: Greening the Internet and The Internet Economy.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
Rolling	North Pacific Research Board	Research Grant	Up to \$800,000	Life Sciences, Biological Research, Social Science	The North Pacific Research Board provides grants to organizations to conduct research activities on, or relating to, fisheries and marine ecosystems in the North Pacific Ocean, Bering Sea, Aleutian Islands, Gulf of Alaska, and Arctic. NPRB prioritizes research that improves understanding of marine ecosystems and enhances effective fishery management and sustainable use of marine resources.
Rolling	Open Technology Fund	Research Grant	\$50,000 - \$200,000	Computer Science, Digital Security, Internet Freedom	The Internet Freedom Fund supports technologists and activists working bring to life ideas that advance inclusive and safe access to global communications networks, counteract censorship and surveillance, and mitigate digital security threats to Internet freedom specifically for at-risk users, journalists, human-rights defenders, civil society activists, and others living in repressive environments. Projects must fall within one of the following areas: Technology Development, Applied Research, Digital Security, or Community Convenings.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
Rolling	Transformational Partnerships Fund	Programmatic Grant	Up to \$100,000	Diversity Equity and Inclusion, Student Success	The Transformational Partnerships Fund supports colleges and universities interested in exploring partnerships and collaborations that could fundamentally transform the way they operate — centering students in solutions that deliver stability and success. Catalytic grants can be used to engage third-party technical assistance providers knowledgeable in law, finance, governance, fundraising, human resources, and other related fields. These grants may support the exploration of partnerships in many forms — ranging from shared administrative services or consolidated academic offerings on one end of the spectrum, to full mergers on the other. Partnerships supported by TPF typically involve two or more degree-granting institutions of higher education. These can include private nonprofit colleges, public universities or systems, community colleges, and (in exceptional situations) for-profit institutions. One or more of the participating institutions must serve a student population that is at least 25 percent persons of color and/or where 40 percent meet the financial criteria for Pell eligibility; One or more of the participating institutions deem the partnership to be transformational and that, if completed, it would make a material difference to the operations of the institution(s); The partnership, if completed, is expected to produce materially better outcomes for current and/or future students of the institution(s).
Rolling	Robert Wood Johnson Foundation	Research Grant	Average Award: \$315,031 (over 1-3 years)	Health Equity, Arts & Humanities, Sociology, Business	Pioneering Ideas: Exploring the Future to Build a Culture of Health seeks proposals that are primed to influence health equity in the future. They are interested in ideas that address any of these four areas of focus: Future of Evidence; Future of Social Interaction; Future of Food; Future of Work. Additionally, we welcome ideas that might fall outside of these four focus areas, but which offer unique approaches to advancing health equity and our progress toward a Culture of Health. They want to hear from scientists, anthropologists, artists, urban planners, community leaders—anyone, anywhere who has a new or unconventional idea that could alter the trajectory of health, and improve health equity and well-being for generations to come.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Deadline	Sponsor	Type	Award Amount	Subject Area(s)	Description
Rolling	Found Animals Foundation	Research Grant	Up to \$750,000 (over 3 years)	Veterinary Medicine, Sterilization	Michelson Grants provide funding for research in pursuit of a single-dose, permanent, nonsurgical sterilization product or technology for use in male and female dogs and cats. Investigators are encouraged to submit for "proof of concept" studies in cell culture or rodents (in certain cases), and/or in dogs and cats. When developing a potential approach, applicants should consider the program's goal of bringing to market a low-cost, permanent, nonsurgical sterilant or sterilants that will have a maximum impact in addressing populations of animals driving shelter intake. Strong preference will be given to projects with the potential to produce a prize-winning product or technology, and approaches must represent a significant improvement over existing products. To qualify for a Michelson Grant, a proposed project must pursue a technology, mechanism, or pathway representing an innovative approach to nonsurgical sterilization.
Rolling	Michael J. Fox Foundation for Parkinson's Research	Research Grant	\$2,000,000	Medical Research, Parkinson's Disease	The Alpha-Synuclein Imaging Prize will go to the first team to develop a viable selective alpha-synuclein PET tracer and agree to make that tracer available broadly. In vivo imaging of alpha-synuclein pathology could be useful as a biomarker of the presence of Parkinson's Disease and disease progression and as a pharmacodynamic tool for drug development. There is no deadline for submissions. The award will be issued to the first contestant who submits compelling evidence of a viable selective tracer and agrees to its widespread use.

RFPs for External Non-Governmental Funding Opportunities as of September 1, 2022

Rolling	Smith Richardson Foundation	Research Grant	Up to \$300,000	Public Policy	The Domestic Public Policy Program supports projects that will help the public and policy makers understand and address critical challenges facing the United States. To that end, the Foundation supports research on and evaluation of existing public policies and programs, as well as projects that inject new ideas into public debates. Grant making portfolios include: identifying mechanisms that can inform thinking on fiscal practices at the national, state, and municipal levels; identifying how schools can become more productive (including post-secondary education); and whether costs can be lowered in the criminal justice system while still protecting public safety. The Foundation has a two-stage application process. Initial inquiries should be submitted by mail in the form of the concept paper.
